Math Exercises & Math Problems: Equation Word Problems The tourists are accommodated in 3 hotels. There are 8 more tourists in the second hotel than in the first hotel and in the third hotel there are 14 more tourists than in the second one.

Math Exercises & Math Problems: Equation Word Problems

Word problem #6 A radio station plays "yesterday" by the Beatles once every 2 days. Another radio station plays the same song once every 3 days. How many times in 30 days will both radio stations play the same song on the same day? Word problem #7 Two men running a marathon took a sip of water at the same time 72 minutes after they started the race. If the first man took a sip of water every 9 minutes, how often did the other man take a sip of water?

Least Common Multiple Word Problems

If train A 's distance is equal to $60(t)$ and train B 's distance is equal to $80(t - 1)$, then we can just set those terms equal to each other and solve for t : $60(t) = 80(t - 1)$ $60t = 80t - 80$. $80 = 20t$. $4 = t$. So, four hours after 10:00 is when train A and train B have traveled the same distance. So that 's 2:00 PM.

Sample Math Problem: Two trains leave the station...

Math Word Problems and Solutions - Distance, Speed, Time. Problem 1 A salesman sold twice as much pears in the afternoon than in the morning. If he sold 360 kilograms of pears that day, how many kilograms did he sell in the morning and how many in the afternoon?
