The DGA 2500 forms part of the SUN ® Diagnostic Platform System. Refer to the SUN® Diagnostic Platform Operator's Manual (2: !The SUN Diagnostic Platform!) for an introduction to the system as a whole. The addition of an optional USB to 4 x RS232 connector enables a smoke module, for testing diesel emissions, and a Portable Data Link,

Contains a list of all manufacturers and other specified processors of medical devices registered with the Food and Drug Administration, and permitted to do business in the U.S., with addresses and telephone numbers. Organized by FDA medical device name, in alphabetical order. Keyword index to FDA established standard names of medical devices.

The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provide the most comprehensive and balanced assessment of climate change available. This IPCC Working Group II volume provides a completely up-to-date scientific assessment of the impacts of climate change, the vulnerability of natural and human environments, and the potential for response through adaptation. Written by the world's leading experts, the IPCC volumes will again prove to be invaluable for researchers, students, and policymakers, and will form the standard reference works for policy decisions for government and industry worldwide.

This publication contains practical guidance on the design, implementation and evaluation of appropriate food fortification programmes. They are designed primarily for use by nutrition-related public health programme managers, but should also be useful to all those working to control micronutrient malnutrition, including the food industry.The guidelines are written from a nutrition and public health perspective, and topics discussed include: the concept of food fortification as a potential strategy for the control of micronutrient malnutrition; the prevalence, causes, and consequences of micronutrient deficiencies, and the public health benefits of micronutrient malnutrition control; technical information on the various chemical forms of micronutrients that can be used to fortify foods; regulation and international harmonisation, communication, advocacy, consumer marketing and public education.

Vois. for 1970-71 includes manufacturers' catalogs.
