and designers working in cities today.

## **Urban Street Design Guide | National Association of City ...**

Cities must evolve to meet the demands of these shifting usage patterns. Partnering with holistic logistics planners can help municipal decision makers reconcile the needs of a broad range of users and develop programs and policies that support public health, maximize benefits to the community, and keep vital city supply chains robust and resilient.

## **Urban futures logistics: Street design and planning - Arup**

The NACTO Urban Street Design Guide considers street design as a balance of these two needs and safety as the driving parameter in design. The Guide uses street width and dimension as a primary point of departure. Width is a limiting factor in design when considering the re-organization of a given corridor.

Sidewalk design should go beyond the bare minimums in both width and amenities. Pedestrians and businesses thrive where sidewalks have been designed at an appropriate scale, with sufficient lighting, shade, and street-level activity.

## **Sidewalks | National Association of City Transportation ...**

design, covering the streets, squares and buildings that make up the public face of towns and cities. It includes the arrangement, design and details of these elements and the roles they play in city planning.

## **Urban Design: Street and Square, Third Edition: Moughtin ...**

This core idea remains integral to every urban design decision, even as urban designers now address a broader set of questions of public health, comfort, and enjoyment across the public realm. Urban design supports the creation of vital street-life by promoting diverse and active ground floor uses.

## **Urban Design Principle - DCP**
