"In this magnificent book, Oliver Schuchard provides more than sixty-five exquisite black-and-white photographs spanning his thirty-eight years of photography. In addition, he explains the aesthetic rationale and techniques he used in order to produce these photographs, emphasizing the profound differences between, yet necessary interdependence of, craft and content. Schuchard believes that craft is important, he maintains that the idea behind the photograph and the emotional content of the image are equally vital and are, in fact, functions of one another. The author also shares components of his life experience that he believes helped shape his development as an artist and a teacher. He chose the splendid photographs included in this book from among nearly 5,000 negatives that had been exposed all over the world, from Missouri to Maine, California, Alaska, Colorado, France, Newfoundland, and Hawaii, among many other locations. Approximately 250 negatives survived the initial review, and each of those was printed before a final decision was made on which photographs were to be featured in the book. The final choices are representative of Schuchard's work and serve to substantiate his belief that craft, concept, and self must be fully understood and carefully melded for a good photograph to occur. This amazing work by award-winning photographer Oliver Schuchard will be treasured by professional and amateur photographers alike, as well as by anyone who simply enjoys superb photography."--Publishers website.

and secretary of the navy, extended from the second administration of Grover Cleveland into that of Franklin Roosevelt. His record, writes Henry C. Ferrell, Jr., in this definitive biography, is that of "a skillful legislative diplomat and an exceedingly wise executive encompassed in the personality of a professional politician." As a congressman, Swanson abandoned Cleveland's laissez faire doctrines to become the leading Virginia spokesman for William Jennings Bryan and the Democratic platform of 1896. His achievements as a reform governor are equaled by few Virginia chief executives. In the Senate, Swanson worked to advance the programs of Woodrow Wilson. In the 1920s, he contributed to formulation of Democratic alternatives to Republican policies. In Roosevelt's New Deal cabinet, he helped the Navy obtain favorable treatment during a decade of isolation. The warp and woof of local politics are well explicated by Ferrell to furnish insight into personalities and events that first produced, then sustained, Swanson's electoral success. He examines Virginia educational, moral, and social reforms; disfranchisement movements; racial and class politics; and the impact of the woman's vote. And he records the growth of the Hampton Roads military-industrial complex, which Swanson brought about. In Virginia, Swanson became a dominant political figure, and Ferrell's study challenges previous interpretations of Virginia politics between 1892 and 1932 that pictured a powerful, reactionary Democratic "Organization," directed by Thomas Staples Martin and his successor Harry Flood Byrd, Sr., defeating would-be progressive reformers. A forgotten Virginia emerges here, one that reveals the pervasive role of agrarians in shaping the Old Dominion's politics and priorities.

Germany. Germany housed architect Walter Gropius and the Bauhaus movement; playwrights Bertolt Brecht and Erwin Piscator; artists Hans Richter, George Grosz, John Heartfield, and Hannah Hoch; composers Paul Hindemith, Arnold Schonberg, and Kurt Weill; and dozens of others. In *Art and Politics in the Weimar Period*, John Willett provides a brilliant explanation of the aesthetic and political currents which made Germany the focal point of a new, down-to-earth, socially committed cultural movement that drew a significant measure of inspiration from revolutionary Russia, left-wing social thought, American technology, and the devastating experience of war.
