Distance, a robust and computer-intensive method. The majority of examples illustrate how probability and statistics can be applied to ecosystem management challenges. There are over 50 exercises - making this book suitable for a lecture course in a natural resource and/or wildlife management department, or as the main text in a program of self-study. Key features: Reviews different approaches to wildlife and ecosystem management and inference. Uses simulation as an accessible way to explain probability and stochastic model behavior to beginners. Covers material from basic probability through to hierarchical Bayesian models and spatial/ spatio-temporal statistical inference. Provides detailed instructions for using R, along with complete R programs to recreate the output of the many examples presented. Provides an introduction to Geographic Information Systems (GIS) along with examples from Quantum GIS, a free GIS software package. A companion website featuring all R code and data used throughout the book. Solutions to all exercises are presented along with an online intelligent tutoring system that supports readers who are using the book for self-study.

This edition focuses on concepts that are isolated in a logical sequence. It explains how accountants manipulate financial statements, discusses the three common features of criminal and ethical misconduct including opportunity, pressure and rationalization, and much more.

Make smart business decisions! Recognizing that most students will become managers, and not accountants, Jiambalvo's Managerial Accounting, Second Edition focuses on the knowledge and skills that managers need to make good business decisions. Students and instructors alike have praised the clear and concise writing style - discussions are to the point, ideas are illustrated, and examples are presented to make the ideas concrete. A novel about freaks, geeks, crushes, and friends—and how sometimes you can be all of them at once. Charlie is the freak. Gloria is the freak magnet. They're pretty much destined to meet. And when they do, sparks fly . . . for Charlie. Gloria, well, she just thinks he's like every other freak who feels compelled to talk to her, although a little better-looking than most. While Charlie has his head in the clouds, Gloria's got hers in a book: her Freak Folio—a record of every weirdo who's talked to her in the last year (it's a big book). But never before has she felt the pull to get to know one of them better. Until now. In this he-said-she-said tale of love, loss, and lucky signs from the author of the ac-claimed Funny Little Monkey, two young strangers at a crossroads in their lives become friends by happy accident (okay, maybe some harmless stalking is involved—and not by the person you'd think!) and forever change each other.
