The collapse is fundamentally due to the unstable position; the instantaneous cause of the collapse is secondary. In the same vein, the growth of the sensitivity and the growing instability of the market close to such a critical point might explain why attempts to unravel the local origin of the crash have been so diverse.

Why Stock Markets Crash: Critical Events in Complex ...  
market capitalization has shrunk to a mere \$25.1 trillion. A  
stock market crash of 30% would still correspond to an  
absolute loss of about \$7.5 trillion dollars. Market crashes can  
thus swallow years of pensions and savings in an instant.  
Could they make us suffer even more by being the precursors  
or triggering factors of major recessions, as in 1929–33
